Database Extensions

Search for an extension

Docs

Enabled extensions

uuid-osspp1.1

Installed in extensions schema

Generate universally unique identifiers (UUIDs)

Docs

pg_stat_statements1.11

Installed in extensions schema

Track planning and execution statistics of all SQL statements executed

Docs

pg_stat_statements

pg_stat_statements is used by Query Performance

plpgsql1.0

Installed in pg_catalog schema

PL/pgSQL procedural language

Docs

pgcrypto1.3

Installed in extensions schema

Cryptographic functions

Docs

pg_graphql1.5.11

Installed in graphql schema

Pg_graphql: GraphQL support

supabase/pg_graphql

Docs

pg_graphql is used by GraphQL

Available extensions

btree_gin1.3

Support for indexing common datatypes in GIN

Docs

citext1.6

Data type for case-insensitive character strings

Docs

tablefunc1.0

Functions that manipulate whole tables, including crosstab

Docs

refint1.0

Functions for implementing referential integrity (obsolete)

Docs

sslinfo1.2

Information about SSL certificates

Docs

wrappers0.5.0

Foreign data wrappers developed by Supabase

supabase/wrappers

Docs

wrappers is used by Supabase Wrappers

http1.6

HTTP client for PostgreSQL, allows web page retrieval inside the database.

Docs

tsm_system_time1.0

TABLESAMPLE method which accepts time in milliseconds as a limit

Docs

moddatetime1.0

Functions for tracking last modification time

Docs

autoinc1.0

Functions for autoincrementing fields

Docs

pg_repack1.5.2

Reorganize tables in PostgreSQL databases with minimal locks

Docs

hypopg1.4.1

Hypothetical indexes for PostgreSQL

Docs

pg_prewarm1.2

Prewarm relation data

Docs

pgsodium3.1.8

Postgres extension for libsodium functions

michelp/pgsodium

Docs

pgsodium is used by Supabase Vault

postgis3.3.7

PostGIS geometry and geography spatial types and functions

Docs

pg_net0.14.0

Async HTTP

supabase/pg_net

Docs

pg_net is used by Database Webhooks

dict_xsyn1.0

Text search dictionary template for extended synonym processing

Docs

pg_trgm1.6

Text similarity measurement and index searching based on trigrams

Docs

unaccent1.1

Text search dictionary that removes accents

Docs

ltree1.3

Data type for hierarchical tree-like structures

Docs

tsm_system_rows1.0

TABLESAMPLE method which accepts number of rows as a limit

Docs

plpgsql_check2.7

Extended check for plpgsql functions

Docs

index_advisor0.2.0

Query index advisor

supabase/index_advisor

Docs

index_advisor is used by Index Advisor Report

pgstattuple1.5

Show tuple-level statistics

Docs

address_standardizer_data_us3.3.7

Address Standardizer US dataset example

Docs

cube1.5

Data type for multidimensional cubes

Docs

pgjwt0.2.0

JSON Web Token API for Postgresql

michelp/pgjwt

Docs

Deprecated

postgis_topology3.3.7

PostGIS topology spatial types and functions

postgis_raster3.3.7

PostGIS raster types and functions

pg_walinspect1.1

Functions to inspect contents of PostgreSQL Write-Ahead Log

Docs

pgrowlocks1.2

Show row-level locking information

Docs

postgres_fdw1.1

Foreign-data wrapper for remote PostgreSQL servers

Docs

pg_stat_monitor2.1

The pg_stat_monitor is a PostgreSQL Query Performance Monitoring tool, based on PostgreSQL contrib module pg_stat_statements. pg_stat_monitor provides aggregated statistics, client

		information, plan details including plan, and histogram information.
rum 1.3 RUM index access method Docs	pg_jsonschema 0.3.3 Pg_jsonschema Docs	postgis_sfcgal 3.3.7 PostGIS SFCGAL functions
intarray 1.5 Functions, operators, and index support for 1-D arrays of integers Docs	pgrouting 3.4.1 PgRouting Extension Docs	hstore 1.8 Data type for storing sets of (key, value) pairs Docs
postgis_tiger_geocoder 3.3.7 PostGIS tiger geocoder and reverse geocoder	earthdistance 1.2 Calculate great-circle distances on the surface of the Earth Docs	pgmq 1.4.4 A lightweight message queue. Like AWS SQS and RSMQ but on Postgres.
vector 0.8.0 Vector data type and ivfflat and hnsw access methods pgvector/pgvector Docs vector is used by Supabase Vector Install extension to use Supabase Vector	dict_int 1.0 Text search dictionary template for integers Docs	pg_hashids 1.3 Pg_hashids Docs
insert_username 1.0 Functions for tracking who changed a table Docs	pgtap 1.2.0 Unit testing for PostgreSQL Docs	pgroonga_database 3.2.5 PGroonga database management module Docs
btree_gist 1.7 Support for indexing common datatypes in GIST Docs	pgaudit 17.0 Provides auditing functionality Docs	seg 1.4 Data type for representing line segments or floating-point intervals Docs
fuzzystrmatch 1.2 Determine similarities and distance between strings Docs	dblink 1.2 Connect to other PostgreSQL databases from within a database Docs	tcn 1.0 Triggered change notifications Docs
pgroonga 3.2.5 Super fast and all languages supported full text search index based on Groonga Docs	bloom 1.0 Bloom access method - signature file based index Docs	address_standardizer 3.3.7 Used to parse an address into constituent elements. Generally used to support geocoding address normalization step. Docs
in 1.2 Data types for international product numbering standards Docs	pg_cron 1.6 Job scheduler for PostgreSQL ctusdata/pg_cron Docs pg_cron is used by Supabase Cron Install extension to use Supabase Cron
